Now integrating with mobile devices, HänelSoft® WMS is a powerful software package that offers practical configuration options and numerous add-on modules enabling it to be individually tailored to every customer's needs. HänelSoft® offers a wide range of functions for efficient storage management. Complex routines and processes are clearly and concisely visualized. Templates, icons and other user-friendly functions, such as drag and drop for shelf management, make system operation much easier and speeds up data input as well.

With a platform-independent and browser-based programming, HänelSoft® can be used with tablets and smartphones. Unlike a desktop application, HänelSoft® is based on browser technology so that it is available anytime and anywhere, permitting independent access to storage data regardless of location. The software does not require additional installations and features platform independence. Mobile devices can be integrated with even more flexibility using handheld terminals to optimize storage processes in the warehouse.

BENEFITS TO HÄNELSOFT® FOR MOBILE

- The database and web server are integrated – and that makes installation and maintenance tasks much easier.
- Open technology to accommodate other database systems.
- Data entry via barcode scanner directly at the Hänel system control point.
- Flexible interfaces for ERP systems – csv, xml and web service

For more information on HänelSoft®, contact Alan Carey, Vice President of Sales, at 443-561-3021 or email info@conveyorhandling.com.
