Keneco's Kenrail Track can be modified to fit any brand of carton flow rack and used with new and existing flow rack systems. These roller tracks are durable, reliable, and designed to provide you with maximum flexibility for all your carton flow handling and order picking operations.

As the most important component of any flow rack, the Kenrail Track stands apart from the competition for its superior features and performance. Constructed with a galvanized finish for a lifetime of rust-free use, the Kenrail Track features a downward-facing design that ensures continued flow by making it resistant to collected debris. For optimal carton flow, the track features polyethylene wheels that are 7/8" in diameter on 1 1/2" centers.

For more information on Keneco's carton flow roller track, contact Alan Carey, Vice President of Sales, at 443-561-3021 or email info@conveyorhandling.com.
