## Why Choose Industrial LED?

LED is one of the most energy efficient, reliable and rapidly developing lighting technologies. LED products maximize illumination using approximately 75% less energy than an incandescent bulb and can last approximately 25 times longer. These lighting solutions are ideal for industrial warehouses, commercial, retail, and manufacturing spaces as well as infrastructure projects.

#### Cost Saving Benefits

- Increased Energy Efficiency
- Saves 50% to 90% of Energy Cost
- Greater Than 100,000 Hour Rated Life
- No Lamps or Ballasts to Change

#### Earth Friendly Benefits

- Green-Sustainable Lighting Solution
- RoHS Compliant
- Mercury and Lead Free

#### Operational Benefits

- Instant On/Off
- No Cycling Delay
- Low Operating Temperature
- High Shock Resistant
- Silent Running (No Hum)

#### Light Quality Benefits

- Focused Light
- Improved Color Efficiency
- No Ultra-Violet or Infrared Radiation
- Produces Full Spectrum Light
- No Flicker

According to the U.S. Department of Energy, lighting represents 40-60% of the average commercial building's electric bill. Many utility companies offer rebates and incentives to offset the cost for the installation and project a two year return on the investment.
