HIGH SPEEDS AHEAD

To meet the demands of today's distribution warehouse, a complex intralogistics concept needs to be implemented. The Hänel Rotomat® industrial carousel is the ideal automated materials handling system for this purpose. Optimizing procedures, increasing flexibility and lowering costs are just a few of the benefits of Rotomat® storage carousels.

The vertical carousel with its short travel paths and therefore swift retrieval of requested articles enables top order-picking performance. An operator can pick, put and fill orders at multiple Hänel Rotomats® in parallel. As the Hänel microprocessor control systems are linked up to the enterprise resource planning system, the orders are displayed directly at the microprocessor controllers and the Hänel Rotomats® are pre-positioned in working groups.

THE "BIG 5" ADVANTAGES OF USING HANEL STORAGE SYSTEMS

- **MORE FLOOR SPACE:** Vertical storage frees existing floor space that can be used to store more inventory or add additional services without the cost of new construction or relocation.
- **INCREASED ACCURACY:** Hänel's inventory management options can improve inventory accuracy to over 99%, reducing overstocking, parts shortages, expired items and time wasted correcting errors.
- **GREATER PRODUCTIVITY:** More parts can be picked or placed in less time, with fewer people, for a significant time savings and a big boost in productivity.
- **ENHANCED SECURITY:** All valuable inventory items are contained under lock and key for enhanced security, and can optionally be further protected by password-access or a key card swipe.
- **IMPROVED ERGONOMICS:** All parts are brought directly to the person, eliminating the need to walk long rows of shelving, climbing, and stooping to access parts, and carrying heavy or bulky items on ladders.

For more information on Hänel's Rotomat® carousel, contact Alan Carey, Vice President of Sales, at 443-561-3021 or email info@conveyorhandling.com.
