## E24+™ Communications

Hytrol revolutionized the industry with its 24-volt conveying solution, E24™. E24™ takes the versatility and ease of maintenance of our E24™ technology and adds the sleekness and simplified control of network communication.

In E24™, accumulation is built directly into each card, which communicates with the cards around it and back to the monitor. Network communication makes it simple for you to set up commands and view your solution's status with a gateway that interfaces with up to 60 zones at a time. While eliminating air

requirements to the conveyor, this technology continues with a 125,000-hour design life or over 14 years of continuous operation and allows for increased throughput with speeds that are easily changeable.

With E24™, you can:

- Create gapping solutions
- Track product within a system
- Gather statistical information
- Check balance of parallel lines
- Access advanced commands and settings
- Override default system settings as need

For more information on Hytrol's E24™ Conveyor, contact Alan Carey, Vice President of Sales, at 443-561-3023 or email [info@conveyorhandling.com](mailto:info@conveyorhandling.com).
