Facility Lighting Solutions offers energy efficient industrial LED lighting solutions for your warehouse, manufacturing plant or distribution center. They have partnered with MaxGreen who manufactures the highest quality, energy efficient, and environmentally friendly LED lighting backed by a five (5) year warranty. LED lights use 50%-90% less electricity than traditional light sources and last more than 100,000 hours, eliminating maintenance costs for approximately 11-20 years. This technology replaces outdated metal halide, fluorescent, and HID lighting.

According to the U.S. Department of Energy, lighting represents 40% of the average commercial building's electric bill and of those buildings, 70% still operate lighting systems that were installed prior to 1986. Tax incentives, energy company and government rebates are available on select LED lighting

#### **BENEFITS OF LED:**

- ◆ *Cost Saving:* increased energy efficient, no lamps or ballasts to change, 100,000+ hour rated life
- ◆ *Earth Friendly:* green-sustainable lighting solution (mercury and lead free)
- ◆ *Light Quality:* focused light, improved color efficiency, no flicker, no ultra-violet or infrared radiation
- ◆ *Operational:* low operating temperature, silent running, no cycling delay, instant on/off

*For more information on Facility Lighting Solutions or to request an energy analysis of your distribution or warehouse facility, please contact Mark Espenshade at 443-561-3052 or email [mespenshade@conveyorhandling.com](mailto:mespenshade@conveyorhandling.com).*
