POLY-V BELT DRIVEN LIVE ROLLER CONVEYOR

Hytrol's Poly-V belt driven conveyors are an alternative to chain rollers providing an efficient, quiet and maintenance free operation. The unique polyurethane v-belts used to drive the rollers prevent jumping and reduce noise by absorbing shock and vibrations. The Poly-V series of conveyors is ideally suited for heavier loads such as pallets, drums, containers and totes. Accumulation is possible when combined with our EZLogic® zero pressure accumulation system and a more energy efficient operation is attainable when paired with our E24™ 24 VDC motor. With six different Poly-V belt models, Hytrol provides the ideal pallet handling solution for you.

Poly-V Belt Driven Conveyor Highlights

- Quiet operation
- No lubrication
- Maintenance free
- Freezer applications
- 25 series capacity, 3,000 lbs.
- 199 series capacity, 600 lbs.
- Closer roller centers
- Lower guard for loading product

Downloads

To learn more about Hytrol's Poly-V Belt Driven Conveyor, download the [Product Focus Sheet](#).

199-PVR Poly-V Belt Driven Live Roller

The Model 199-PVR is a light-duty poly-v belt driven live roller conveyor. The roll-to-roll belt drive makes this conveyor ideal for light duty pallet handling where no maintenance or a more quiet conveyor is desirable.

- 11 Bed Widths
- Shaft Mounted Drive
- Reversible
- Poly-V Belt Driven Rollers
- Adjustable MSN-Type Floor Supports Available

25-PVR Poly-V Belt Driven Live Roller

The heavy design of the 25-PVR allows it to be used for conveying higher load capacities such as loaded pallets and drums. Poly-V belt driven rollers make it ideal for conveying heavier parts where no maintenance or a more quiet conveyor is required.

- 15 Bed Widths
- Shaft Mounted Drive
- Reversible
- Poly-V Belt Driven Rollers
- Adjustable HSN-Type Floor Supports Available
