ROLLING WITH CONVEYOR

TGW Systems IntelliROL motorized-roller conveyor sets the standard in material handling flexibility. Its key is the use of a motorized roller that powers each zone or segment of the conveyor. A truly modular system that can be completely customized to meet your current requirements, IntelliROL can be easily reconfigured to address your future needs.

The unique CRUZ frame design, with rollers mounted low, provides total protection for the electronic components that are pre-mounted and pre-wired at the factory. An optional conveyor shroud encloses the frame and provides additional protection for the electrical components.

For the highest level of versatility and features that positively contribute to a quieter, more easily maintained system, put the power of TGW Systems IntelliROL to work for you.

For more information on TGW's IntelliROL motorized roller conveyor, contact Alan Carey, Vice President of Sales, at 443-561-3021 or email info@conveyorhandling.com.
