Mezzanines, otherwise known as platforms or steel structures, offer a cost-effective solution to increasing valuable floor space. Steele Solutions offers four types of steel mezzanine solutions: free standing, building supported, rack supported, and shelving supported.

For efficient operation of distribution centers, mezzanines are ideal for commercial and industrial applications. They are designed to fit high ceiling facilities, supporting a high load capacity and offering wide open space and can be used both indoors and outdoors. Features, including various decking options, may be added that are unique to your building or industry. Accessories including handrails, stairs, ladders, gates, and crossovers are also available.

BENEFITS OF MEZZANINE STORAGE:

- ◆ Creating storage space while gaining more efficient use of existing overhead space in the distribution center or warehouse facility
- ◆ Supporting equipment, conveyors, materials, parts or products overhead
- ◆ Providing access over machinery and materials
