CONVEYOR HANDLING COMPANY RELEASES FIRST CASE STUDY

Elkridge, MD, May 20, 2015 –Conveyor Handling Company has released its first case study with Dotcom Distribution. Conveyor Handling Company and Hytrol collaborated to produce an automated material handling system capable of meeting the customer’s current business needs, while also allowing for future growth. The new system accommodates increased capacity, accuracy and speed, while creating a significant reduction in labor.

Dotcom Distribution is a strategic eCommerce logistics partner focused on serving B2B and B2C multi-channel operations through statement packaging, fast fulfillment and freight management services. Located in Edison, NJ, their facility provides same-day shipping for most clients with an accuracy rate of 99.5%. With a versatile material handling system, their facility handles a wide range of products, from electronics to healthcare products to clothing and pet supplies. Dotcom Distribution is a company focused on building trust through flawless order fulfillment, transportation expertise, and long-lasting relationships.

“We created a very good and trusting relationship with Conveyor Handling Company,” said Nick Pendrous, CIO for Dotcom Distribution. “They presented to us a proposal with Hytrol equipment and obviously, that’s a very well-known and recognized brand in the industry. Due to our relationship with Conveyor Handling Company and based on their recommendation, that was the plan we ultimately chose.” Furthermore, Pendrous said that the relationship with Conveyor Handling Company was a large factor in the choice for a material handling provider. “Similar to the way we do business, we look for a relationship that we can trust, and we found that during the bidding process,” he said. “We built an open dialogue and a trusting relationship with Conveyor Handling Company. Their proximity helped during the planning and implementation stages of the project.”

Conveyor Handling Company completed Dotcom’s automated material handling system in the last quarter of 2014. For more information, please visit www.conveyorhandling.com/case-studies-videos/.

About Conveyor Handling Company:

Conveyor Handling Company is a leading material handling systems integrator specializing in solutions for product distribution, storage, and manufacturing applications. Conveyor Handling Company provides turn-key systems using a comprehensive process of data analysis, layout development, vendor/manufacturer selection, implementation, post-commissioning preventative maintenance/service, and total project management.

Conveyor Handling Company’s solutions also include WMS/WCS and control software, conveyor and sortation, AGV’s/robotics, scanning and vision, palletizing, order picking, AS/RS, dynamic and static product storage, mezzanine, ergonomic and safety equipment, LED warehouse lighting, packaging, in addition to most allied warehouse equipment and supplies.

Conveyor Handling Company is uniquely positioned in the market as an independent systems integrator, allowing a true needs-based and collaborative approach to develop the right solution. In addition, Conveyor Handling Company uses a combination of in-house analytical and engineering capabilities coupled with the resources of our prominent supplier partners, who consist of the top names in the industry.

For over 40 years Conveyor Handling Company has provided a vast range of case, unit and pallet handling solutions for many customers, including Fortune 500 companies and the U.S. Government.
