

# RACKING UP PALLETS

## CONCRETE COUNTERTOP SOLUTIONS CASE STUDY

Concrete Countertop Solutions, based in Scott Township, PA is a one stop shop for all decorative concrete and concrete countertop needs.

**The Challenge:** Updating their new warehouse racking and flow rack system to maximize the warehouse space and efficiency. To find a solution to store oversized products (8' long pallets) while having added room in the warehouse for further storage.

**The Solution:** Double deep pallet racks and a fork truck with extra-long forks to retrieve these 8' long pallets.

### Technologies Used:

- Mallard Flow 3-Rail Wheeled System
- Tri-Boro Rack
- Worldwide Wire Deck

**The Results:** A total of 184 pallet positions, 36 positions in flow rack and 39 pick shelves

*"Maximum storage was achieved in our warehouse. Our sales engineer, Tom's, knowledge of products and service was beyond expectations. Everything, from inception to completion, went smoothly."*

~Ed Baldoni, President
